Infusions & Botanicals for
Gin&Tonic, Vodka&Tonic and Rum&Cola

TÉ
TONIC®

The Idea

To infuse the gin in order to obtain subtle notes between different aromas and flavours.- Thus, Té Tonic, a blend of botanicals, herbs and spices, in a special pyramid-shaped silk pouch, allowing you to add just the right degree of flavour to your Gin and Tonic.

Why use infusions with balanced, certified gin? simply for the pleasure of it and to balance the aroma and flavour of the Gin and Tonic, highlighting its essence.

By using the same gin with different Té Tonic blends, we discover a notable change in the aromas, leaving the authentic taste we appreciate largely unaltered.
